

ORDINANCE NO. 118

AN ORDINANCE AMENDING ORDINANCE NO. 12 ESTABLISHING REGULATIONS, STANDARDS, REQUIREMENTS AND PROCEDURES FOR THE SUBDIVISION OF LAND IN THE TOWN OF CLINT, EL PASO COUNTY, TEXAS, AND ITS EXTRATERRITORIAL JURISDICTION, PLANNING AND PLATTING JURISDICTION, PROVIDING FOR AMENDMENTS THERETO, AND PROVIDING FOR A PENALTY FOR A VIOLATION THEREOF.

BE IT ORDAINED BY THE TOWN COUNCIL OF THE TOWN OF CLINT, TEXAS, THAT:

Ordinance No. 12 is hereby amended to include the following and shall now additionally read as follows:

Division 1. General and Administrative Provisions.

Section 1.1. Authority and Scope of Rules.

These rules are adopted by the Town of Clint, El Paso County, Texas, under the authority of the Local Government Code, Chapter 212 and Water Code, Sec.16.350. Notwithstanding any provision to the contrary, these rules apply only to a subdivision which creates two or more lots of five acres or less intended for residential purposes. Lots of five acres or less are presumed to be for residential purposes unless the land is restricted to nonresidential uses on the final plat and in all deeds and contracts for deeds.

Section 1.2. Purpose.

It is the purpose of these rules to promote the public health of the Town's residents, to ensure that adequate water and wastewater facilities are provided in subdivisions within the corporate limits and extraterritorial jurisdiction of the Town, and to establish the minimum standards for water and wastewater facilities.

Section 1.3. Effective Date.

These rules become effective on the 1st day of July, 2003.

Section 1.4. Repealer.

Ordinance No. 12, is hereby amended, and all provisions inconsistent with this amendment are hereby repealed, except as to such sections which are retained herein.

Section 1.5. Plat Required.

- (a) The owner of a tract of land located within the corporate limits of the Town that divides the tract in any manner that creates two or more lots of five acres or less intended for residential purposes must have a plat of the subdivision prepared. Lots of five acres or less are presumed to be for residential purposes unless the land is restricted to nonresidential uses on the final plat and all deeds and contract for deeds.

- (b) No subdivided land shall be sold or conveyed until the subdivider:
- (1) has received approval of a final plat of the tract; and
 - (2) has filed and recorded with the County Clerk of El Paso County a legally approved plat.
- (c) A division of a tract is defined as including a metes and bounds description, or any description of less than a whole parcel, in a deed of conveyance or in a contract for a deed, using a contract of sale or other executory contract, lease/purchase agreement, or using any other method to convey property.

Section 1.6. Supercession.

These rules supercede any conflicting regulations of the Town of Clint.

Section 1.7. Severability.

If any part or provision of these regulations, or application thereof, to any person or circumstance is adjudged invalid by any court of competent jurisdiction, such judgment shall be confined in its operation to the part, provision, or application directly involved in the controversy in which such judgment shall have been rendered and shall not affect or impair the validity of the remainder of these regulations or the application thereof to other persons or circumstances. The Town hereby declares that it would have enacted the remainder of these regulations without any such part, provision or application.

Section 1.8. Definitions.

- (1) *The Town of Clint, El Paso County, Texas.* Any reference to an act of the Town, shall be deemed to include the acts of the Town Council.
- (2) *County.* El Paso County, Texas.
- (3) *Drinking water.* All water distributed by any agency or individual, public or private, for the purpose of human consumption, used in the preparation of foods or beverages, cleaning any utensil or article used in the course of preparation or consumption of food or beverages for human beings, human bathing, or clothes washing.
- (4) *Engineer.* A person licensed and authorized to practice engineering in the State of Texas under the Texas Engineering Practice Act.
- (5) *Final Plat.* A map or drawing and any accompanying material of a proposed subdivision prepared in a manner suitable for recording in the county records and prepared as described in these regulations.
- (6) *Lot.* An undivided tract or parcel of land.
- (7) *Non-public water system.* Any water system supplying water for domestic purposes which is

not a public water system.

(8) *OSSF*. On-site sewage facilities as that term is defined in rules and/or regulations adopted by the TNRCC, now known as Texas Commission for Environmental Quality, including, but not limited to, 30 TAC Chapter 285.

(9) *Platted*. Recorded with the county in an official plat record.

(10) *Public water system*. A system for the provision to the public of water for human consumption through pipes or other constructed conveyances, which includes all uses described under the definition of drinking water. Such a system must have at least 15 service connections or serve at least 25 individuals at least 60 days out of the year. This term includes any collection, treatment, storage, and distribution facilities under the control of the operator or such system and used primarily in connection with such system; and any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system. Two or more systems with each having a potential to serve less than 15 connections or less than 25 individuals but owned by the same person, firm, or corporation and located on adjacent land will be considered a public water system when the total potential service connections in the combined systems are 15 or greater or if the total number of individuals served by the combined systems total 25 or more at least 60 days out of the year. Without excluding other meanings of the terms "individual" or "served," an individual shall be deemed to be served by a water system if he lives in, uses as his place of employment, or works in a place to which drinking water is supplied from the system.

(11) *Purchaser*. Shall include purchasers under executory contracts for conveyance of real property.

(12) *Retail public utility*. Any entity meeting the definition of a retail public utility as defined in Water Code, Sec. 13.002.

(13) *Sanitarian*. A person registered as a Professional Sanitarian by the Texas Department of Health under the authority of Texas Civil Statutes, Article 4477-3.

(14) *Sewerage Facilities*. The devices and systems which transport domestic wastewater from residential property, treat the wastewater, and dispose of the treated water in accordance with the minimum state standards contained or referenced in these rules.

(15) *Subdivider*. Any owner of land or authorized agent thereof proposing to subdivide or dividing land so as to constitute a subdivision.

(16) *Subdivision*. Any tract of land divided into two or more parts that results in the creation of two or more lots of five acres or less intended for residential purposes. A subdivision includes a re-subdivision (replat) of land which was previously divided.

(17) *TAC*. Texas Administrative Code, as compiled by the Texas Secretary of State.

(18). *TNRCC*. Texas Natural Resource Conservation Commission, now known as Texas Commission for Environmental Quality.

(19). *Water facilities.* Any devices and systems which are used in the supply, collection, development, protection, storage, transmission, treatment, and/or retail distribution of water for safe human use and consumption.

Division 2. Minimum Standards.

Section 2.1. Scope of Standards.

The establishment of a residential development with two or more lots of five acres or less where the water supply and sewer services do not meet the minimum standards of this division is prohibited. A subdivision with lots of five acres or less is presumed to be a residential development unless the land is restricted to non residential use on the final plat and all deeds and contracts for deeds.

Section 2.2. Water Facilities Development.

(a) Public water systems.

- (1) Subdividers who propose to supply drinking water by connecting to an existing public water system must provide a written agreement with the retail public utility. The agreement must provide that the retail public utility has or will have the ability to supply the total flow anticipated from the ultimate development and occupancy of the proposed subdivision for a minimum of 30 years. The agreement must reflect that the subdivider has paid the cost of water meters and other necessary connection equipment, membership fees, water rights acquisition costs, or other fees associated with connection to the public water system so that service is immediately available to each lot.
- (2) Where there is no existing retail public utility to construct and maintain the proposed water facilities, the subdivider shall establish a retail public utility and obtain a Certificate of Convenience and Necessity (CNN) from the TCEQ. The public water system, the water quality and system design, construction and operation shall meet the minimum criteria set forth in TAC, Sec.s 290.38-290.51 and Sec.s 290.101-290.120. If groundwater is to be the source of the water supply, the subdivider shall have prepared and provide a copy of a groundwater availability study which shall include an analysis of the long term (30 years) quantity and quality of the available groundwater supplies relative to the ultimate needs of the subdivision. If surface water is the source of supply, the subdivider shall provide evidence that sufficient water rights have been obtained and dedicated, either through acquisition or wholesale water supply agreement, that will provide a sufficient supply to serve the needs of the subdivision for a term of not less than 30 years.

(b) Non-public water systems.

Where individual wells or other non-public water systems are proposed for the supply of drinking water to residential establishments, a test well or wells located so as to be representative of the quantity and quality of water generally available from the supplying aquifer shall be drilled by the subdivider and the produced waters sampled and submitted to

a private laboratory for a complete chemical and bacteriological analysis of the parameters on which there are drinking water standards. The subdivider shall have prepared and provide a copy of a groundwater availability study which shall include an analysis of the long term (30 years) quantity of the available groundwater supplies relative to the ultimate needs of the subdivision. The water quality of the water produced from the test well must meet the standards of water quality required for community water systems as set forth in 30 TAC, Sec.s 290.103, 290.105, 290.106 and 290.110, either:

- (1) without any treatment to the water; or
 - (2) with treatment by an identified and commercially available water treatment system.
- (c) Transportation of potable water.

The conveyance of potable water by transport truck or other mobile device to supply the domestic needs of the subdivision is not an acceptable method, except on an emergency basis. Absence of a water system meeting the standards of these rules due to the negligence of the subdivider does not constitute an emergency.

Section 2.3. Wastewater Disposal.

- (a) Organized sewerage facilities
- (1) Subdividers who propose the development of an organized wastewater collection and treatment system must obtain a permit to dispose of wastes from the TCEQ, in accordance with 30 TAC Chapter 317 from the TCEQ.
 - (2) Subdividers who propose to dispose of wastewater by connecting to an existing permitted facility must provide a written agreement with the retail public entity. The agreement must provide that the public utility has or will have the ability to treat the total flow anticipated from the ultimate development and occupancy of the proposed subdivision for a minimum of 30 years. The agreement must reflect that the subdivider has paid the cost of all fees associated with connection to the wastewater collection and treatment system so that service is immediately available to each lot. Engineering plans for the proposed wastewater collection lines must comply with 30 TAC Chapter 317. Figure: 31 TAC, Sec. 364.33(a)(2).
- (b) On-site sewerage facilities.
- (1) On-site facilities which serve single family or multi-family residential dwellings with anticipated wastewater generations of no greater than 5,000 gallons per day must be designed by a registered professional engineer or registered professional sanitarian, permitted by the authorized agent of the TCEQ, and in all respects comply with 30 TAC Chapter 285.
 - (2) Proposals of on-site sewerage facilities for the on-site disposal of sewerage in the amount of 5,000 gallons per day or greater must comply with 30 TAC Chapter 317.

- (3) The TCEQ, or its authorized agent shall review proposals for on-site sewerage disposal systems and make inspections of such systems as necessary to assure that the system is in compliance with the Texas Health and Safety Code, Chapter 366 and rules in 30 TAC Chapter 285, and in particular Sec.s285.4, 285.5 and 285.30-285.39. In addition to the unsatisfactory on-site disposal systems listed in 30 TAC, Sec. 285.3(b), pit privies and portable toilets are not acceptable waste disposal systems for lots platted under these rules.

Section 2.4. Greywater Systems for Reuse of Treated Wastewater.

- (a) Organized or municipal sewerage systems. Any proposal for sewerage collection, treatment and disposal which includes greywater reuse shall meet minimum criteria of 30 TAC Chapter 210 and Chapter 285, Subchapter H promulgated and administered by the TCEQ.
- (b) On-site sewerage facilities. Any proposal for on-site sewerage disposal which includes provisions for greywater use shall meet the minimum criteria of 30 TAC Chapter 285 contained within the "Construction Standards for On-Site Sewerage Facilities" promulgated by the TCEQ.

Section 2.5. Sludge Disposal.

The disposal of sludge from water treatment and sewerage facilities shall meet the criteria of 30 TAC Chapter 312 and Chapter 317.

Section 2.6. Setbacks.

In areas that lack a nationally recognized fire code as listed in Local Government Code, Sec. 235.002(b)(2) and lack water lines sized for fire protection, setbacks from roads and right-of-ways shall be a minimum of 10 feet, setbacks from adjacent property lines shall be a minimum of five feet, and shall not conflict with separation or setback distances required by rules governing public utilities, on-site sewerage facilities, or drinking water supplies. Setback lines required elsewhere in the orders or rules of the Town shall control to the extent greater setbacks are therein required.

Section 2.7. Number of Dwellings Per Lot.

No more than one single family detached dwelling shall be located on each subdivision lot. A notation of this restriction shall be placed on the face of each subdivision plat.

This restriction shall be placed in all deeds and contracts for deeds for real estate sold within the subdivision. Where otherwise authorized, proposals which include multi-family residential structures shall include adequate, detailed planning materials required by the Town for determination of proper water and wastewater utility type and design.

Division 3. Plat Approval.

Section 3.1. Applications for Plat Approval.

- (a) Owner representation. An application for approval of a plat shall be filed by the record owner of the

property to be subdivided or the duly authorized agent of the record owner.

(b) Standards. Every plat creating two or more lots of five acres or less for residential use shall comply with the standards of Division 2 and the requirements of Division 3 of this Ordinance.

Section 3.2. Final Engineering Report.

The final plat shall be accompanied by an engineering report bearing the signed and dated seal of a professional engineer registered in the State of Texas. The engineering report shall discuss the availability and methodology of providing water facilities and wastewater treatment service to individual lots within the subdivision. A detailed cost estimate per lot acceptable to the Town shall be provided for those unconstructed water supply and distribution facilities and for wastewater collection and treatment facilities which are necessary to serve each lot of the subdivision. The plan shall include a construction schedule for each significant element needed to provide adequate water or wastewater facilities. If financial guarantees are to be provided under Section 3.4 of this Ordinance, the schedule shall include the start dates and completion dates.

(a) Public Water Systems

(1) Where water supplies are to be provided by an existing public water system, the subdivider shall furnish an executed contractual agreement between the subdivider and the retail public utility to the effect that the retail public utility has or will have the ability to supply the total flow anticipated from the ultimate development and occupancy of the proposed subdivision for a minimum of 30 years and that the subdivider has provided for payment of costs or fees for the connection of each individual lot to the public water system, including water meters, water acquisition fees, or other necessary expenses required by the retail public utility. Before final plat approval, plans and specifications for the proposed water facilities shall have been approved by all entities having jurisdiction over the proposed project, which may include the TCEQ, and the County Health Department in addition to the responsible departments of the Town. If groundwater is to be the source of the water supply, the final engineering report shall include a groundwater availability study which shall include comments regarding the long term (30 years) quantity and quality of the available groundwater supplies relative to the ultimate needs of the subdivision.

(2) Where there is no existing retail public utility to construct and maintain the proposed water facilities, the subdivider shall establish a retail public utility and obtain a Certificate of Convenience and Necessity (CNN) from the TCEQ, and include evidence of the CNN issuance with the plat. Before final plat approval, plans and specifications for the proposed water facilities shall have been approved by all entities having jurisdiction over the proposed project. If groundwater is to be the source of the water supply, the final engineering report shall include a groundwater availability study which shall include an analysis of the long term (30 years) quantity and quality of the available groundwater supplies relative to the ultimate needs of the subdivision. If surface water is the source of supply then the final engineering report shall include evidence that sufficient water rights have been obtained and dedicated, either through acquisition or wholesale water supply agreement, that will provide a sufficient supply to serve the needs of the subdivision for a term of not less than 30 years.

(b) Non-public water systems.

Where individual wells are proposed for the supply of drinking water to residences, the final engineering report shall include the quantitative and qualitative results of sampling the test wells in accordance with Section 2.2(b) of this Ordinance. The results of such analysis shall be made available to the prospective property owners. If the water quality of the test well required pursuant to Section 2.2(b) of this Ordinance does not meet the water quality standards as set forth in that section without treatment by an identified and commercially available water treatment system, then the final report must state the type of treatment system that will treat the water produced from the well to the specified water quality standards, the location of at least one commercial establishment within the County at which the system is available for purchase, and the cost of such system, the cost of installation of the system, and the estimated monthly maintenance cost of the treatment system. The engineer shall issue a statement concerning the availability of groundwater supplies to serve the fully developed subdivision over the next 30 years. Such statement may be based on information available from the Texas Water Development Board's Office of Planning. The description of the required sanitary control easement shall be included.

(c) Organized sewerage facilities

(1) Where wastewater treatment is to be provided by an existing retail public utility, the subdivider shall furnish evidence of a contractual agreement between the subdivider and the retail public utility and must provide that the retail public utility has or will have the ability to treat the total flow anticipated from the ultimate development and that the subdivider has paid the cost of all fees associated with connection to the wastewater collection and treatment system so that service is immediately available to each lot. Before final plat approval, an appropriate permit to dispose of the wastes shall have been obtained from the TCEQ, and plans and specifications for the proposed wastewater collection and treatment facilities shall have been approved by all entities having jurisdiction over the proposed project.

(2) Where there is no existing retail public utility to construct and maintain the proposed sewerage facilities, the subdivider shall establish a retail public utility and obtain a CNN from the TCEQ. Before final plat approval, a wastewater treatment permit authorizing the treatment of the wastewater for the ultimate build-out population of the subdivision shall have been obtained from the TCEQ, and plans and specifications for the proposed sewerage facilities shall have been approved by all entities having jurisdiction over the proposed project.

(d) On-site sewerage facilities.

Where private on-site sewerage facilities are proposed, the final engineering report shall include planning materials required by 30 TAC. Sec.285.30 and all other information required by applicable OSSF regulations.

Section 3.3. Additional Information.

The Town may, at its option, require additional information necessary to determine the adequacy of proposed water and wastewater improvements as part of the plat approval process. Such information may include, but not be limited to:

(1) layout of proposed street and drainage work;

- (2) legal description of the property;
- (3) existing area features;
- (4) topography;
- (5) flood plains;
- (6) description of existing easements;
- (7) layout of other utilities;
- (8) notation of deed restrictions;
- (9) public use areas; or
- (10) proposed area features.

Section 3.4. Financial Guarantees for Improvements.

(a) Applicability.

If an adequate public or non-public water system or sewerage facility is not available from a retail public utility, or are not constructed by the subdivider, to serve lots intended for residential purposes of five acres or less at the time final plat approval is sought, the Town shall require the owner of the subdivided tract to execute an agreement with the Town secured by a bond, irrevocable letter of credit, or other alternative financial guarantee such as a cash deposit which meet the requirements set forth below.

(b) Bonds.

A bond that is submitted in compliance with paragraph (a) of this section shall meet the following requirements.

- (1) The bond or financial guarantee shall be payable to the Mayor of the Town, in his official capacity, or the Mayor's successor in office.
- (2) The bond or financial guarantee shall be in an amount determined by the Town to be adequate to ensure proper construction or installation of the public or non-public water facilities, and wastewater facilities to service the subdivision, including reasonable contingencies, but on no event shall the amount of the bond be less than the total amount needed to serve the subdivision as established by the engineer who certifies the plat.
- (3) The bond shall be executed with sureties as may be approved by the Town. The Town shall establish criteria for acceptability of the surety companies issuing bonds that include but are not limited to:
 - (A) registration with the Secretary of State and be authorized to do business in Texas;
 - (B) authorization to issue bonds in the amount required by the Town; and
 - (C) rating of at least B from Best's Key Rating Guide; or if the surety company does not have any such rating due to the length of time it has been a surety company, the surety company must demonstrate eligibility to participate in the surety bond guarantee program of the Small Business Administration and must be an approved surety company listed in the current United States Department of Treasury Circular 570. Such bonds shall meet the criteria contained in the rules and regulations

promulgated by the United States Department of Treasury.

- (4) The bond shall be conditioned upon construction or installation of water and wastewater facilities meeting the criteria established by Division 2 of this Ordinance and upon construction of facilities within the time stated on the plat, or on the document attached to the plat for the subdivision, or within any extension of time granted by the Town.

(c) Letter of Credit.

A letter of credit that is submitted in compliance with paragraph (a) of this section shall meet the following requirements.

- (1) Any letter of credit submitted as a financial guarantee for combined amounts greater than \$10,000 and less than \$250,000 must be from financial institutions which meet the following qualifications.

(A) Bank Qualifications:

- (i) must be federally insured;
- (ii) Sheshunoff rating must be 10 or better and primary capital must be at least 6.0% of total assets; and
- (iii) total assets must be at least \$25 million.

(B) Savings and loan association qualifications:

- (i) must be federally insured;
- (ii) tangible capital must be at least 1.5% of total assets and total assets must be more than \$25 million or tangible capital must be at least 3.0% of total assets if total assets are less than \$25 million; and
- (iii) Sheshunoff rating must be 30 or better.

(C) Other financial institutions qualifications:

- (i) the letter of credit must be 110% collateralized by an investment instrument that would meet the qualifications for a Town investment; and
- (ii) the investment instrument must be registered in the Town's name and the Town must receive safekeeping receipts for all collateral before the letter of credit is accepted.

- (2) Any letter of credit submitted as a financial guarantee for combined amounts greater than \$250,000.00 must be from financial institutions which meet the following qualifications.

(A) Bank qualifications:

- (i) must be federally insured;
- (ii) Sheshunoff rating must be thirty or better and primary capital must be at least 7.0% of total assets; and
- (iii) total assets must be at least \$75 million.

(B) Savings and loan association qualifications:

- (i) must be federally insured;
- (ii) tangible capital must be at least 3.0% of total assets and total assets must be greater than \$75 million, or tangible capital must be at least 5.0% of total assets if total assets are less than \$75 million; and
- (iii) Sheshunoff rating must be 30 or better.

(C) Other financial institutions qualifications:

- (i) the letter of credit must be 110% collateralized by an investment instrument that would meet the qualifications of a Town investment; and
- (ii) the investment instrument must be registered in the Town's name and the Town must receive safekeeping receipts for all collateral before the letter of credit is accepted.

- (3) The letter of credit shall list as sole beneficiary the Mayor of the Town, in his official capacity, or the Mayor's successor in office, and must be approved by the Town.
- (4) The letter of credit shall be conditioned upon installation or construction of water and wastewater facilities meeting criteria established under Division 2 of this ordinance and upon construction of facilities within the time stated on the plat, or on the document attached to the plat for the subdivision, or within any extension of time granted by the Town.

(d) Financial guarantee.

The Town will determine the amount of the bond, letter of credit, or cash deposit required to ensure proper construction of adequate water and wastewater facilities in the subdivision.

(e) Alternative to Town accepting a financial guarantee.

The Town may approve a final plat under this section without receiving a financial guarantee in the name of the Town if:

- (1) the property being subdivided lies wholly within the extraterritorial jurisdiction of a municipality; and
- (2) the Town has executed an interlocal agreement with the County that imposes the obligation to the County to:

- (A) accept the bonds, letters of credit, or other financial guarantees, that meet their requirements of this section;
- (B) execute the construction agreement with the subdivider; and
- (C) assume the obligations to enforce the terms of the financial guarantee under the conditions set forth therein and complete construction of the facilities identified in the construction agreement.

Section 3.5. Review and Approval of Final Plats.

(a) Scope of review.

The Town will review a final plat to determine whether it meets the standards of Division 2 and the requirements of Division 3 of this Ordinance.

(b) Disapproval authority.

The Town shall refuse to approve a plat if it does not meet the requirements prescribed by or under these rules.

(c) Prerequisites to approval.

Final plat approval shall not be granted unless the subdivider has accomplished the following:

- (1) dedicated the sites for the adequate water and sewerage facilities identified in the final plat to the appropriate retail public utility responsible for operation and maintenance of the facilities; and
- (2) provided evidence that the water facilities and sewerage facilities have been constructed and installed in accordance with the criteria established within these rules and approvals from TCEQ, of the plans and specifications for such construction, including any change orders filed with these agencies; or
- (3) obtained all necessary permits for the proposed water facilities and sewerage facilities (other than for OSSF permits on individual lots within the proposed subdivision) and has entered into a financial agreement with the Town secured by a bond or other alternative financial guarantee such as a cash deposit or letter of credit for the provision of water and sewerage facilities with the bond or financial guarantee meeting the criteria established in Division 3 of this Ordinance.

Section 3.6. Time Extensions for Providing Facilities.

(a) Reasonableness.

The Town may extend, beyond the date specified on the plat or on the document attached to the plat, the date by which the required water and sewer service facilities must be fully operable if:

- (1) any financial guarantees provided with the final plat as originally submitted are effective for the time of the requested extension or new financial guarantees that comply with Section 3.4 are submitted which will be effective for the period of the extension; and
- (2) the Town finds the extension is reasonable and not contrary to the public interest.

(b) **Timeliness.**

If the facilities are fully operable before the expiration of the extension period, the facilities are considered to have been made fully operable in a timely manner.

(c) **Unreasonableness.**

An extension is not reasonable if it would allow a residence in the subdivision to be inhabited without water or sewer services that meet the standards of Division 2 of this Ordinance.

Section 3.7. Criteria for Subdivisions that Occurred Prior to September 1, 1989.

(a) **Authority and scope.**

This section shall apply only to tracts of land that were divided into two or more parts to lay out a subdivision before September 1, 1989, and have not been platted or recorded.

(b) **Purpose.**

It is the purpose of this section to promote the public health of the Town's residents, to ensure that adequate water and sewerage facilities are provided in subdivisions within the Town and its extraterritorial jurisdiction, and to establish the minimum standards for pre-1989 subdivisions for which no plat has been filed or recorded in the records of the County.

(c) **Required plat.**

In the event that the owner of a tract of land located within the Town or its extraterritorial jurisdiction who subdivided the tract into two or more parts to lay out a subdivision of the tract prior to September 1, 1989, including an addition, or to lay out suburban lots or building lots, and to lay out streets, alleys, squares, parks, or other parts of the tract intended to be dedicated to public use or for the use of purchasers or owners of lots fronting on or adjacent to the streets, alleys, squares, parks, or other parts, was legally obligated to, but has failed to have a plat of the subdivision prepared, approved by the Town, and filed with the County, the owner of a residential lot which was created by the subdivision may have a plat of the individual lot prepared and approved by the commissioners court as provided in this section in lieu of a plat of the subdivision.

(d) **Special criteria.**

The Town may approve the plat of a residential lot which does not comply with the provisions of Sec. 1.5(b) of this Ordinance (sale restrictions), Sec. 2.6 of this Ordinance (Setbacks), Sec. 2.7 of this Ordinance (Number of Dwellings per Lot), Sec. 3.2 of this Ordinance (Final Engineering Report), and Sec. 3.4 of this Ordinance (Financial Guarantees for Improvements) as applied to an individual subdivided lot if such approval is in harmony with the general purpose and intent of this Ordinance so that the public health, safety, and welfare may be secured and substantial justice done.

- (1) Owners of individual lots in a single unplatted subdivision may file a joint request for approval of their respective individual residential lots.
- (2) An application for approval of the plat of an individual lot shall be made in writing. The

application shall state specifically the division, section, or subsection with which the plat does not comply and from which a waiver is being requested. The application shall contain available information and documentation which supports the requested approval. The applicant shall also provide such additional documentation as the Town may request to support the application, including:

- (A) a copy of a dated plat, sales contract, utility records, or other acceptable documentation that the subdivision occurred prior to September 1, 1989;
- (B) the name and address of the original subdivider or the subdivider's authorized agent, if known;
- (C) a survey and plat of the lot for which approval is requested, showing existing residences, roads, and utilities; and
- (D) a deed, an affidavit of ownership or other evidence of ownership of the lot for which approval is requested.

(3) Approval of plats of individual lots shall be granted subject to the limitations of state law, and based on written findings by the Town that:

- (A) the lot for which approval is requested is within a tract that was subdivided prior to September 1, 1989, and is not owned by the original subdivider;
- (B) a plat was required for the subdivision, but has not been filed with the county by the subdivider legally obligated to file it;
- (C) an existing, currently occupied residential dwelling is located on the lot;
- (D) existing water and sewer services which comply with the minimum standards set forth in this Ordinance are available to the lot; and
- (E) the request is reasonable, compliance with specified sections of these rules is impractical, and a waiver is not contrary to the public health and safety.

(e) Final determination.

The Town shall make the final decision on an application for a waiver. The applicant may withdraw a request for a waiver at any point in the process. If the requested waiver application is approved, the Town shall issue a certificate stating that a plat of the residential lot has been reviewed and approved.

Division 4. Enforcement.

Section 4.1. Oversight.

The owner, by submitting a plat, acknowledges the authority of the Town and state agencies to lawfully enter and inspect property for purposes of execution of their statutory duties. Such inspection will not

release the owner from any obligation to comply with the requirements of these rules.

Section 4.2. General Enforcement Authority.

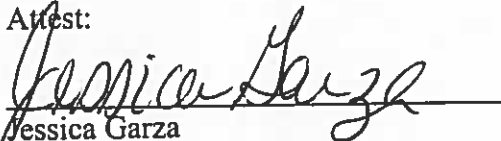

The provisions of this Ordinance are enforceable pursuant to the specific provisions hereof related to enforcement and state law including Water Code, Chapter 7 and Sections 16.352, 16.353, 16.3535, 16.354, and 16.3545, and Local Government Code, Section 212.0175 and 212.018.

SIGNED AND ENACTED this 1st day of July, 2003.

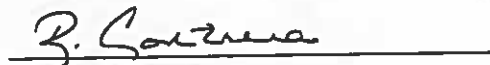

Charles E. Gonzalez
Mayor
